I had the pleasure of testing the Lotus Sanitizing System for use in my home. I am asthmatic and have several allergies one of them being dust. I found the system very easy to use and extremely cost effective as you use your own tap water...no cleaning products whatsoever therefore, no chemicals.

I used the product in the kitchen, bathrooms and bedroom. I found it amazing that everything in bathroom shined the same if not better than using abrasive cleaners. On a normal morning, I would usually wake up sneezing. Since using the Lotus System, I have not once sneezed at home. I found that after cleaning my bedroom furniture, the dust did not adhere to it as quickly as it would have with my conventional cleaning methods.

I truly believe this product will help alleviate my allergy and asthma attacks.
