Dear Adriana,

I was a big skeptic of the Lotus system as we introduced it into our facility. Many green companies have high claims with poor results. I figured at best it would be just below the cleaners that we were previously using through the shop.

I was very surprised to see how well it works. Our cleaning staff saw the difference right away and use it from that day forward for all our glass, floors, walls etc. We were so happy with the product that we placed another system in our wash bay and are now using it for interior and exterior detailing of customers vehicles.

The fact that it is a green product is what originally got us to try it out and now we see that it actually surpasses our old products. Not only that but we are saving money by not purchasing all sorts of different cleaners on a regular basis.

Thanks again

Franco Gobbato
